

2.3 Exceptions

The different ports are all at different levels of development. Test cases must be able to be disabled on a per port basis. Permutations also must be able to be disabled on a

seems more maintainable.

2.4 Running

The tests must be able to run unaided. The test suite must run 2(a)]23(all)-]23(platforms)-222(that)-223(sdcc-238(le)

2.5 Artifacts

The test code within the test cases should not generate artifacts. An artifact occurs-238(le)25(v)15(el)when the t

2.6 Emulators

3.4 CoreLinux++ Assertion framework

```
{class} {type} i = 0;  
i = i + 1;  
ASSERT((i == 1));  
}
```
